Mosholu Ave. Nr W. 256th St.
New York

Nurseries in
Holland, France. United States
Canada

# INTRODUCTION

HEN we were called upon a third of a century ago to exhibit our products at the great Chicago World's Fair, we could not then show as perfect bulbs, flower roots and plants as we are now able to do. Still we got their lovers

able to do. Still we got their lovers interested, and again even more so in 1904 at the Louisiana Purchase Exposition in St. Louis, where we received the highest awards. Many of those whom we had the pleasure of meeting at these and other exhibitions, as well as those who visited our European nurseries, have ever since been purchasing from us all their requirements in the bulb line. They continually called our attention to the advantage of coming in closer contact with the American consumers, and in compliance with these numerous requests we decided to establish a branch office and trial grounds on this side of the Atlantic, and brought with us a staff of capable men to answer all questions in connection with the cultivation and arrangement of bulbs and flowers.

A number of plans are always on hand, showing how to arrange an attractive display around the house throughout the year, as well as colored photographs showing many varieties, sizes, natural colors, etc., and in this connection we are pleased to state that Commissioners of Parks in Western cities and managers of large estates are co-operating with us to show our products to those interested, but who are unable to visit our New York trial grounds. As we intend having expositions continually, we most cordially invite every one interested to visit our trial grounds.

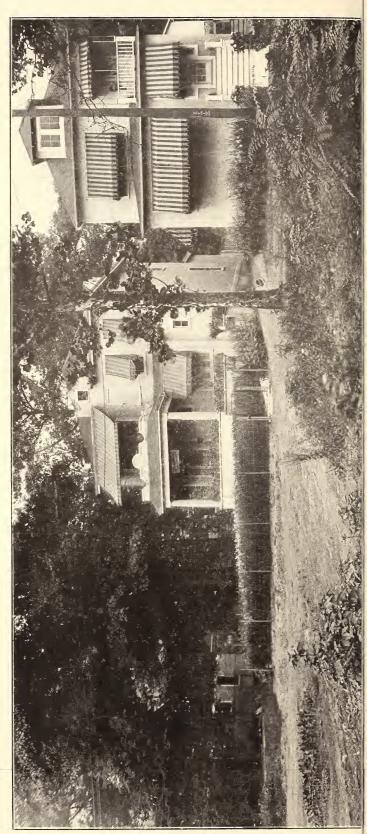

The late war set things so sadly back in many respects, but we gladly notice that continuous growing enthusiasm for our products, which encourages us to devote all our energies to bring varieties, sizes, and colors to greater perfection. We made an offer 27 years ago to give a bulb free to any school child in New York who might apply for it, without results. But when, in the fall of 1921, we made the same offer, we disposed of 36,000 bulbs. The response was so great and unexpected that a New York newspaper stated that certainly the joy these bulbs will give their youthful owners will create a greater love for flowers, and doubtless result in the cultivation of pure hearts and spirits in the great journey before them.

We shall be pleased to hear from any one who may be interested in our products, and with the assurance that we will do our utmost to supply the best articles at the lowest possible prices in order to be within the reach of every one.

Flowers and plants belong in and around the home, and it is true, in sorrow and gladness, in darkness and light, they always give welcome and pleasure.

Most cordially yours,

FLOWERDALE BULB AND PLANT CO.

THE HOME OF FLOWERDALE

### DARWIN TULIPS

No.	Per 100

512—FREESIA PURITY, white
513—ALLIUM NEOPOLITANUM 3.00
THE CONTRACTOR OF THE CONTRACT

### **BULBS**

6.00

Safe in the earth they lie, serenly waiting; They never speak to north winds or to snow, Perfume and color in the dark creating, Fit for the sunlit world that they will know.

514—ORNITHOGALUM ARABICUM .....

I held them in my hand, small balls of wonder, Purple and ivory and brown. I broke the soft, dark earth to fold them under,

And pressed the yielding soil to hold them down.

I know that in their hearts the rainbow lingers, Waiting until it hears a song it knows.
Oh, strange—to hold a rainbow in my fingers!
It lies there waiting for the melting snows!

And long before I hear the bluebird singing, Truth will be stirring in my garden beds. And oh, it will be early that I'll find there Small, green hooded heads!

The little brown song sparrow that comes daring To pour his heart out on an empty bough, Will linger in my garden to be sharing The seven colors that are sleeping now.
